SARS COV-2 (COVID-19) ***NOT DETECTED*** NOT DETECTED (NEGATIVE)

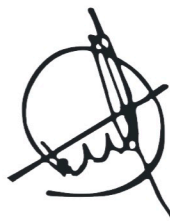

METODO: R T - P C R
(Reverse transcriptase polymerase chain reaction)

INTERPRETATION RESULTS:

D E T E C T E D : Specific nucleic acid sequences of viral genes of SARS-CoV-2, the coronavirus that causes COVID-19, were identified.

N O T D E T E C T E D : The specific nucleic acid sequences of SARS-CoV-2 viral gene were not identified either by total or partial absence (undetectable concentrations), by this technique. Given this result, it is recommended to continue the surveillance of suspected cases and it is recommended to repeat the study based on the clinical evolution.

Diagnóstico release of INDRE No. DGE-DDYR-DSAT-03323-2020 AL Genós.
